

Franklin Street and Ann Street Reconstruction

Project Information Meeting

December 6, 2016

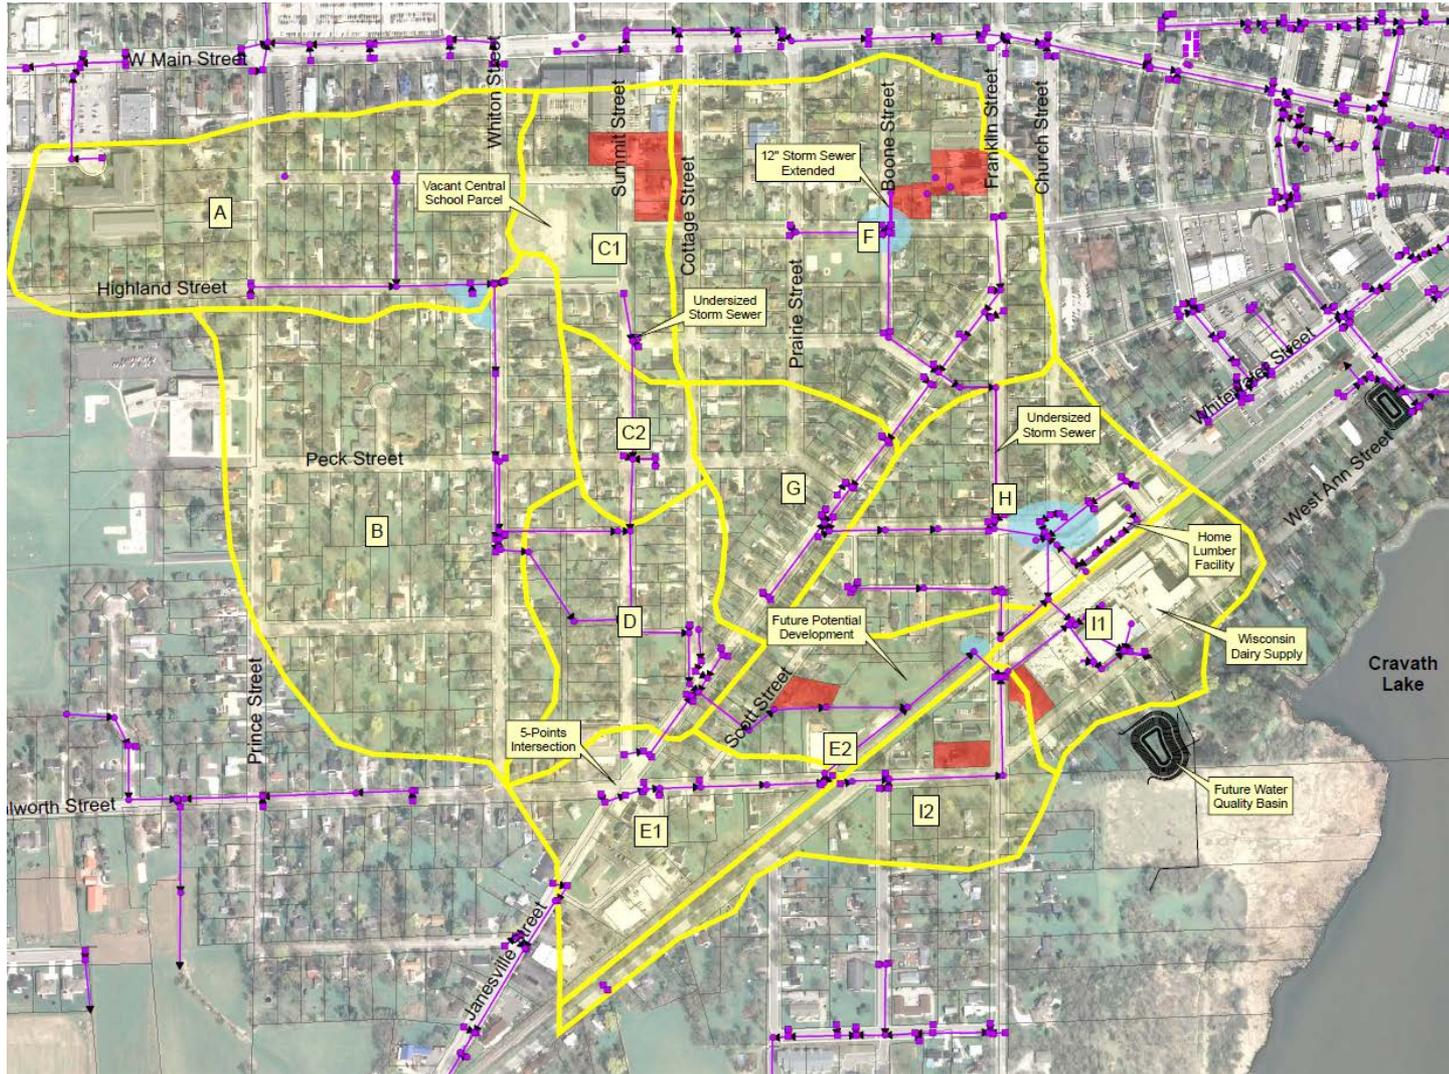

Project Area

Project Background

- Stormwater concerns on Whitewater Street led to study of the 196 acre “Basin 15” in 2002 and an update of the study in 2014
- The 2014 study identified storm sewer sizing for various storm events. The city decided to proceed with design for the 100 year storm event.
- Preliminary engineering tasks 2015-2016
- Project scope has evolved from a storm sewer project into a complete infrastructure replacement project.
- Project is planned for 2017 construction

"Basin 15" Map

Project Scope

- New (large) storm sewer on Whitewater Street, Franklin Street, and Ann Street (including easement areas)
- New sanitary sewer and water main, including new connections to individual properties
- Complete reconstruction of Franklin Street and Ann Street in project area (no widening)
- Replacement of sidewalk and addition of sidewalk where it does not currently exist (ADA compliant)
- New stormwater detention basin on newly acquired city land (water quality)

Project Challenges

- Large storm sewer requiring deep excavation and bedrock excavation.
- Railroad crossing (three underground utilities) and improved surface for street and sidewalks. Coordination with the railroad is required.
- Working in off-road easement areas
- Petroleum-contaminated site near railroad crossing

Project Schedule

Franklin Street and Ann Street Reconstruction Whitewater, Wisconsin Proposed Schedule										
Task	2016	2017								
	Dec.	Jan.	Feb.	March	April	May	June	July	Aug.	Sept.
